

ENTRY FORM - EXCELLENCE IN INNOVATION

The submission for innovation should demonstrate the entrant has:

- Defined the challenge, identified possible solutions and secured agreement from key stakeholders.
- Focused their outcomes on constructor needs and user or occupier benefits, leading to more work on subsequent projects.
- Been able to demonstrate improvements compared to previous or 3rd party performance through objective measurement data, such as KPIs.
- Created a solution that can be used or applied elsewhere in their organisation or their industry sector.
- Taken the lessons learned and the new best practice benchmark to the industry and shared them so others can benefit.

A winning approach to offsite construction will demonstrate a number of the following attributes:

- A systematic approach to the implementation of offsite solutions.
- Tangible benefits delivered by using an offsite approach over and above traditional methods including value against time, cost, quality.
- Contributed to the commercial demands of the client and sustained the needs of the local community.
- Provided a unique and innovative environment when benchmarked against other building solutions
- Delivered additional USP's against traditional construction methods

Great examples of transformational digital construction will evidence:

- Integrated and collaborative teams, with early engagement of the supply chain.
- Sharing of information through common data environments and system integration.
- Innovative new tools, methods and processes that capture, manipulate and exploit data across the entire project team and through construction phase and into the in-use operational phase.
- Evidence of improved performance and better outcomes compared to traditional methods through submission of objective measurement data.
- Demonstrable benefits to stakeholders over the lifecycle of the asset.
