

Networking Breakfast & Presentation on Designing for Neurodiversity and Inclusive Environments with Stephanie Kyle

**Floyd
Slaski**

altro

Hosted by Altro Limited

After the fantastic success of our previous event, where we were left wanting to learn more, we are pleased to offer another opportunity to hear from Stephanie again with her full 90 minute presentation on this highly topical subject.

Stephanie is Associate, Architect and Inclusive Design Consultant at Floyd Slaski, specialising in design for neurodiversity. She is the first recipient of the AJ100 Change Maker of the Year Award for inclusive design contribution to the profession.

Stephanie is passionate about diversity, equality and inclusion in architecture and channels her extensive knowledge and creativity into designing innovative and aesthetically beautiful spaces, ensuring that each project meets the highest architectural standards and demonstrates that inclusivity can be both functional and visually inspiring.

Stephanie offers specialist guidance to designers, clients and decision-makers, ensuring the seamless integration of inclusive design principles throughout every stage of the project, encompassing considerations for religion, gender-neutral facilities, and a specialist focus on neurodiverse inclusive design and invisible disabilities and inspiring the next generation of architects.
